

Robotics Day Vorarlberg

Frastanzer Brauerei, Bahnhofstraße 22, 6820 Frastanz

19th of March 2024, 5 pm

Registration: helena.hosp@fhv.at

The aim of this Robotics Day Vorarlberg is to give participants an insight into the food supply chain at Frastanzer Brauerei. The brewery is characterized by its connection to the regional community and nature and relies on traditional brewing techniques and local ingredients to produce beers of the highest quality.

A central aspect is the optimization of the supply chain, which enables the brewery to procure its raw materials efficiently and bring its products to market on time. It uses proven logistics processes and maintains partnerships with local suppliers to ensure a smooth supply.

Frastanzer Brauerei integrates modern technologies, focusing on practical solutions that increase efficiency without compromising the authenticity of the brewing process. This is not just about optimizing production, but also about preserving the brewery's unique craftsmanship and history.

By emphasizing a sustainable supply chain and combining tradition and innovation, Frastanzer Brauerei is able to present its products with pride while making a positive contribution to the environment and community.
