

Robotics Day Vorarlberg

Servus Intralogistics

Doktor-Walter-Zumtobel-Straße 2

6850 Dornbirn

16th of October 2024

13:00 – 17:00pm

Registration: helena.hosp@fhv.at

**Artificial intelligence,
smart technologies
and efficient intra-
logistics:
Servus Intralogistics
will be providing
exciting insights at
Robotics Day
Vorarlberg.**

Robotics Day Vorarlberg

On the agenda? Everything to do with innovative intralogistics solutions you can touch: from the ARC5 - the world's most energy-efficient transport robot - to the latest development, the Servus PickStation. Servus Intralogistics' modular logistics system for the interface-free automation of warehouse and production logistics increases performance, efficiency and speed along a company's entire value chain. The interplay of pioneering hardware and intelligent software defines our smart technologies for future-proof intralogistics.

Show us your passion! After a brief tour of our Smart Factory and a few words from our management, it's your turn: How do you plan automation? How can robots simplify and improve our customers' day-to-day work? How can automation and robotics increase added value in all processes? In a small group project, you will develop your own intralogistics concept, and our experts will be happy to give you tips on what this looks like for real customers in our workshops and the challenges we face every day. That's all behind Servus - serves you more.

We look forward to your visit.

Agenda

13:00 - 14:00 Uhr

Welcome and company tour with introduction to our products

14:00 - 14:30 Uhr

Keynote speech by the Managing Director on the Servus Intralogistics modular system
