

Robotics Day Vorarlberg

illwerke vkw

Weidachstraße 14, 6900 Bregenz

2nd of October 2024, 1:00 – 4:30 pm

Registration: helena.hosp@fhv.at

The aim of this Robotics Day Vorarlberg is to present participants with the latest developments and applications in the field of innovation and digitalization at illwerke vkw Vorarlberg. The focus is on innovative approaches to digital transformation in the areas of hydropower, grid, supply & services and IT.

The systems used enable comprehensive analyses and optimal operating processes for various areas. By integrating modern technologies, precise control measures are implemented to maximize efficiency and performance while taking environmental conditions into account.

The automation and intelligence of these systems not only increase productivity, but also improve safety and sustainability across the entire energy supply sector. High-risk tasks can be efficiently handled by automated systems while human operators monitor and control operations.

The use of state-of-the-art technologies offers promising solutions for making energy generation more efficient, safer and more environmentally friendly, thereby making a significant contribution to the future of energy supply.

Agenda

- 1:00 pm: Welcome and short company presentation
- 1:15 pm: Company tour of the Rieden substation
- 2:15 pm: BREAK with SNACK 15 min.
- 2:30 pm: Lecture on digitalization
- 3:30 pm: Lecture on innovation
- 4:30 pm: END
